Description: Spindrift was a Rseik sector world that had an Imperial base during the Galactic Civil War.

Spindrift Station

Spindrift Station was an Imperial base on the planet Spindrift, used for relaying messages to Imperial Fleets. In 3 ABY, it was attacked by Rebel forces, who slipped through the perimeter disguised as Imperials in TIE/LN starfighters. Ironically this revealed the location of Admiral Giels Fleet, which carried the Teezl, which would have rendered stations like this obsolete.
