Equipment D6 / Silicartha

Name: Silicartha
Cost: 50 credits
Availability: 2

Game Notes: An ingested poison, which leads to stomach pains and cramps before death occurs.

Description: Silicartha was a special type of silica-based poison developed on the planet Tatooine. Moisture farmers used it to kill small creatures like sand-borers that would burrow into their hydroponics gardens. Luke Skywalker once tricked an Imperial officer into believing that he had taken some in order to blackmail him into accessing the data vault on Krake's Planet.
