Planets D6 / Lahsbane

Name: Lahsbane
Region: Mid Rim
Sector: Onatos sector
System: Lahsbane system
Moons: 2
Grid coordinates: R-15
Primary terrain: Forests, canyons
Native species: Lahsbee/Huhk
Primary language(s): Huhk
Major cities: The Forbidden City

Description: Lahsbane was the homeworld of the Lahsbees, who matured into the Huhks. It had river canyons and forest knolls, which were crossed by the use of hot air balloons and gliders. A fine pollen existed on Lahsbane that had a tendency to clog the intake valves on starships, causing frustration to many spacefarers that landed on the planet.

At one point, the Hiromi failed to provoke a war between the people of Lahsbane and the Ewoks. Lahsbane was one of the first worlds to join the New Republic.

The Forbidden City

The Forbidden City was on the Mid Rim planet Lahsbane. It was the home of the mature Huhks, known for their tendency towards violence, and as such, off limits to offworlders for their own protection.

The city was built on a scale appropriate to the large Huhks, and as such had huge doors and windows. This was surprising to any offworlders that did enter the city as it seemed completely out of proportion to the diminutive Lahsbees more frequently encountered by offworlders.

The Forbidden City contained a treasure room that once contained tapes recorded by Yom Argo. Leia Organa and Dani retrieved the tapes, with Dani also stealing some treasure on the side.
