Description: Naldar was an Outer Rim world in the Phelleem sector. Many refugees from Belderone fled to nearby Naldar, but that world was conquered after the Battle of Endor by Imperial Remnant forces led by Flint. The local princess, Vila, impersonated her deceased brother Denin—who had wished to be a Jedi Knight—and went for help from the Alliance of Free Planets. Luke Skywalker managed to redeem Flint. Due to Flint's betrayal, his master, Lumiya, ordered his execution. An Imperial blaster bolt meant for Flint was intercepted by the princess, who died. Her spirit and that of her brother were reunited in the Force.
