Planets D6 / Jerne

Name: Jerne
Region: Outer Rim Territories
Sector: Kanz sector
System: Jerne system
Moons: 2
Grid coordinates: N-4
Primary terrain: Desert
Points of interest: Adony Station, Jerne City H.Q.
Native species: Jerni (extinct)
Immigrated species: Humans
Major cities: Jerne City

Description: Jerne was the Jerni homeworld, until their extinction. It was later home to Human colonists who exhausted its natural resources. During the Galactic Civil War, it was home to an Imperial base.

Princess Leia Organa and Luke Skywalker once visited Jerne to search for an artifact called the Eternity Crystal.

Jerne had two moons.

Places
Adony Station

Adony Station was a small Imperial outpost on the planet Jerne, close to some old ruins of the Jerni. It was described as a rat hole.

Due to the machinations of Darth Vader, it was assumed that the Eternity Crystal was located in the ruins. As a result, Meeka Reen and her guerrillas, along with Luke Skywalker and Leia Organa, assaulted the station, killing its contingent of Imperial troops.

Jerne City

Jerne City was the capital city of the planet Jerne. It was also the former site of an Imperial base.

Jerne City H.Q.

Jerne City H.Q was an Imperial military base located on Jerne. It was under the command of Captain Ryko Vant.
