Droids D6 / Ferry Droid (Modified R2 Astrome

Name: Ferry Droid
Type: Modified Industrial Automaton R2 Astromech Droid

DEXTERITY 1D
KNOWLEDGE 1D
MECHANICAL 2D
Astrogation 5D, Space Transports 3D, Starfighter Piloting 3D
PERCEPTION 1D
STRENGTH 3D
Stamina 5D, Lifting 5D
TECHNICAL 2D
Computer Programming/Repair 4D, Starfighter Repair 5D*
Equipped With:
Two Extendable Legs
2 x Heavy Grasper Arms
2 x Light Grasper Arms
Extendable 0.3 metre long video sensor (360o rotation)
Small electric arc welder (1D to 5D damage, 0.3 metre range)
Small circular saw (4D damage, 0.3 metre range)
Video display screen
Holographic projector/recorder
Fire extinguisher
Acoustic signaller
Small (20cm. by 8 cm.) internal "cargo" area
Some additional tools and equipment

Move: 10
Size: 2 metres

Description: A ferry droid operated a ferry along a lava river on the planet Nevarro. The droid had the appearance of an R2 series astromech droid, though had been modified to have legs and two sets of arms, which he used to row the ferry down the river. When the Mandalorian, Cara Dune, Greef Karga, and IG-11 were attempting to escape forces of Moff Gideon's Imperial remnant with the Child, they boarded the droid's ferry, and the droid began to take them downriver. However, the Mandalorian noticed a number of stormtroopers waiting for them at the end of the tunnel, and Dune urged the droid to stop the ferry. When the droid continued to row, Dune shot the droid, but the droid's destruction did not stop the boat from moving.
