Description: The 125-Z treadspeeder bike was a model of speeder bike which saw service during the war between the First Order and the Resistance.

Characteristics
The First Order Treadspeeders were rugged, shielded patrol speeder bikes which had a design that granted greater traction on unstable terrain. Two of these speeders could be carried aboard an AAL-1971/9.1 Troop Transport. It could also avoid countermeasures that jammed traditional speeders. They could also catapult First Order jet troopers in the air.

History
Two pairs of First Order stormtroopers and jet troopers, on two separate First Order Treadspeeders, pursued Resistance agents Rey, Finn, Poe Dameron, Chewbacca, and droids C-3PO and BB-8 during a skirmish on Pasaana.
