Description: "Finn" was the nickname of FN-2187 ("Eight-Seven"), a Force-sensitive human male stormtrooper who served the First Order until his desertion and subsequent defection to the Resistance during the First Order–Resistance war. Though trained since birth to be a loyal and obedient soldier, FN-2187's conscience conflicted with the methods of the First Order. For a time he was unwilling to support the Resistance, hoping to escape the galactic conflict instead of fighting for a cause he believed was doomed to fail. As the galaxy became consumed by war, the renegade trooper was ultimately forced to decide where his true loyalties lay.

Born in 11 ABY during the New Republic Era, FN-2187 was part of a new generation of stormtroopers—human children conscripted into the military forces of the First Order—modeled on the Republic clone troopers and Imperial stormtroopers of the past. He originally trained with Batch Eight before joining the FN Corps, a sub-branch of the Stormtrooper Corps, and although his potential was recognized by his commanding officers, FN-2187 lacked the ruthlessness that had become common in the ranks under the influence of Captain Phasma. In the waning days of the cold war, he hesitated to kill civilians during his first mission and consequently decided to desert after witnessing the massacre of Tuanul. Lacking experience as a pilot, FN-2187 freed a Resistance prisoner, Commander Poe Dameron, who coined the nickname "Finn" to supplant the renegade stormtrooper's alphanumeric designation. He then sought his own freedom while forming friendships with the Jakku scavenger Rey and the droid BB-8, as well as the Rebel war heroes Han Solo and Chewbacca.

After the destruction of the New Republic, Finn provided the Resistance with the information they needed to destroy the First Order's superweapon, Starkiller Base. During the attack, he was defeated and nearly killed by the dark warrior Kylo Ren. Rescued by Rey and Chewbacca, Finn recuperated from his injuries and by the time he awoke, the Resistance was forced to evacuate their base on D'Qar. Despite attempting to escape from the conflict once more, a mission with Rose Tico convinced Finn to truly join the Resistance to the extent where he nearly sacrificed his life for their cause during the Battle of Crait in 34 ABY. Finn later continued assisting the Resistance by joining Rey on the quest to find the Sith Wayfinder and end the malevolent religion once and for all eight months later, eventually becoming a general along with Poe after Leia's passing. Finn later led the ground forces during the battle on the planet Exegol.

Personality and traits
Finn was a male human. During his time with the First Order, he wore the standard-issue stormtrooper armor. Following his desertion, he discarded his armor, but continued to wear the armor's body glove and shoes, and took to wearing Poe Dameron's jacket as a way to remember him. Upon discovering that Dameron was alive, Finn offered him his jacket back, but the pilot insisted he keep it.

While in service to the First Order, Finn was seen by his training cadre and his fellow soldiers as one of the best stormtroopers that the First Order had to offer. His instructors saw him as loyal to the First Order, as well as dutiful, brave, intelligent, and possessing the strength necessary to be a great stormtrooper and perhaps even eventually one of the group's officers. Finn was trained to believe that the New Republic was depraved and that the First Order was necessary to bring law to a lawless galaxy, and everything he had seen of the galaxy was filtered through his training; the First Order showed him only what they wanted him to see, but he did not doubt its truth. Nonetheless, though as a cadet he was eager to be deployed and see the galaxy so he could serve the First Order and Supreme Leader Snoke, he was plagued by doubt. That doubt came to a head on Jakku, when he refused to fire on the villagers and deserted from the First Order.

Despite his training and education by the First Order, Finn had a good heart and empathy for others. While deployed on Jakku, after witnessing his friend FN-2003 killed by Poe Dameron, he refused to fire on unarmed villagers. These two events shook his belief in the First Order, inspiring him to desert and free Dameron, and eventually help Rey and BB-8 and side with the Resistance.

Finn was also protective of those he cared about. He risked jeopardizing a training mission in order to save FN-2003, and when seeing Rey being carried off by Kylo Ren, ran desperately to rescue her. He later accompanied Han Solo and Chewbacca on a mission to destroy the Starkiller Base's shield generator in order to rescue Rey. As soon as he awoke from his comatose state, a result of his unsuccessful duel with Kylo Ren on Starkiller Base, he immediately inquired about Rey's well being. He had a crush on Rey, partially what drove him to want to protect, help, and follow her to the point of Rose wondering if Rey had "imprinted" on him. Even after realizing that the conflict was greater than any one person, though, he still seemed to hold feelings for Rey, which kept him going throughout the Battle of Crait.

However, Finn was seen to be susceptible to his fear and stress at times, such as during his desertion of the First Order. He seemed desperate to escape their attention and would rather fly across the system than entertain the thought of facing his pursuers. At Maz Kanata's castle he almost abandoned Rey, Han Solo, and Chewbacca in an attempt to escape the conflict, but changed his mind and was later pulled into the battle anyway. He also panicked multiple times during his and Rey's escape from Jakku aboard the Millennium Falcon. When he reunited with Rey outside of the mine on Crait he embraced her tightly, glad to be with her, safe once more.

Finn was courageous in battle once he had made his choice to fight. He immediately ran to battle Phasma when he and Rose were faced with her contingent of Stormtroopers on board the Supremacy's hangar, using the first weapon he could find, a Z6 Riot Control Baton, and ultimately was willing to go into battle and die for the Resistance without regard to his own life; he would rather die than let the First Order win.

As he had little experience with life outside of the conflict, he was initially taken with Canto Bight's glitz and glamour, until Rose showed him the extent of the corruption and evil at the heart of it, abusing fathiers and slave children.

Skills and abilities
As a stormtrooper, Finn consistently scored top marks in his training and was seen as someone who could become an ideal First Order trooper. His First Order training made him an effective marksman with a high kill rate.

This skill with a blaster apparently translated well into skills as a gunner. During the escape from the Finalizer aboard a stolen TIE, Finn managed to kill dozens of stormtroopers, destroy the

contents of the Finalizer's hangar bay, knock out several turbolaser batteries and ventral cannons on the underside of the ship, and even destroy an incoming missile despite having no experience with flying starfighters. In fact, it was only Finn's distraction by an argument with Poe Dameron that led to the stolen TIE being struck by an incoming missile and disabled. The next day, Finn would man the ventral quad-laser cannon turret aboard the Millennium Falcon during the escape from Jakku, destroying one TIE on his own and one with assistance from Rey. He was also able to pilot a ski speeder during the Battle of Crait.

Despite a lack of training in the use of a lightsaber, Finn had the ability to wield this particular weapon in combat. He was able to hold his own against a stormtrooper with a riot baton, and despite being defeated, managed to inflict a shoulder wound on the more experienced Kylo Ren.

Aboard the Supremacy, Finn tested all his skill against his former superior officer, Captain Phasma. Unfortunately, it wasn't enough in a stand-up fight; he had only been able to knock her down with the element of surprise and the high ground.

Like most other First Order stormtroopers, Finn was trained in dealing with wounds incurred on the battlefield. He made use of this training to aid a wounded Chewbacca.

Prior to his defection from the First Order, Finn was considered officer material.
