Description: The Sith personnel carrier was a starship used by the Sith to deploy Sith drop ships into battle.

Characteristics
A Sith personnel carrier was fitted with docking clamps for six individual drop ships and was similar in appearance to the contemporary Derriphan-class battleship.

History
They were deployed during the Great Hyperspace War participating in attacks on key Republic worlds. Once the tide turned against the Empire and Korriban was attacked in the Republic retaliatory invasion of Sith Space, a fleet of personnel carriers jumped into hyperspace and began a decades-long journey to escape the Republic forces and rebuild their Empire.
