Planets D6 / Somov Rit

Name: Somov Rit
Region: Mid Rim
Sector: Onatos sector
System: Somov Rit system
Grid coordinates: R-15
Class: Terrestrial
Atmosphere: Type I (breathable)
Climate: Semi-tropical
Primary terrain: Fields, Marshes, Swamps
Immigrated species: Human
Primary language(s): Basic

Description: Somov Rit was a sparsely populated green world with a native Human population. During the New Sith Wars, Jedi scout Torr Snapit came to the planet seeking Force-sensitive recruits, but his only luck was with three young children: Rain, Tomcat and Bug. Rain later helped rebuild the Sith Order as Darth Bane's apprentice, Darth Zannah.

The natives of the planet went by nicknames due to fear of the legend of the Swamp demon. It was not uncommon for someone to live their whole life without their friends and family being aware of their real name. Maslak plants grew on Somov Rit, and the populace were largely seafaring, subsidizing off of roots and fish.
