    E-5C Heavy blaster rifle (6D)
    SE-14 blaster pistol (4D)
    Thermal detonators (10D, 8D, 5D, 2D)

Move: 7

Description: The Heavy Battle Droid was a modified version of the B1-series battle droid. They were armed with E-5C heavy blaster rifles and a disc shield emitter built into their chests to stop most types of incoming enemy fire. However, their feet were still vulnerable and it slowed their movement significantly. They were nearly identical to standard Geonosis-manufactured B1 Battle Droids with the exception of the grey markings on their head, torso, crotch and limbs.
