

Name: Arakyd Industries Hunter-Killer Probot

DEXTERITY 3D

Dodge 5D

KNOWLEDGE 2D+2

Bureaucracy 3D. Law Enforcement 4D

MECHANICAL 3D

Capital Ship Gunnery 6D, Capital Ship Shields 5D,
Sensors 5D

PERCEPTION 4D

Search 5D

STRENGTH 2D

TECHNICAL 2D+2

Scale: Capital

Size: 150 meters tall

Cost: 165,000 credits

Space: 3

Atmosphere: 105; 300KMH

Shields: 1D

Hull: 4D

Equipped With:

- * 4 heavy grasping extensors (+2D to lifting)

- * 4 fine work grasping extensors

- * Advanced sensor array:

Passive: 40/2D

Scan: 80/2D+2

Search: 100/3D+1

Focus: 5/4D+2

- * Capture system including:

One Tractor Beam Projector

Fire Arc: Front

Space Range: 1-5/15/30

Atmosphere Range: 100-500/1.5/3KM

Damage: 5D

* Internal secure chamber. Large enough to hold a light freighter (30 meters by 30 meters by 10 meters tall).

Weapons:

Two Quad Blaster cannons (fire-linked)

Fire Arc: Turret

Skill: Starship gunnery

Scale comparison

Hunter Killer Probot

Space Range: 1-5/10/17

Atmosphere Range: 100-500/1/1.7KM

Damage: 4D+1

Two Ion Cannon

Fire Arc: Turret

Skill: Starship gunnery

Space Range: 1-3/7/36

Atmosphere Range: 100-300/700/3.6KM

Damage: 4D

Description: The Hunter-Killer probot, also known as the H-K probot, was a bizarre evolution of the more common Viper probe droid. Produced by Arakyd Laboratories, they were commonly used as autonomous patrol vehicles near Imperial worlds.

Shaped roughly like its design predecessor, the Hunter-Killer was a technological monstrosity scaled up to capital ship-size. The interior of each droid was designed to be a detainment platform for captured starships, with tractor beam projectors covering the droid's outer hull, ready to drag wayward ships into one of several internal docking bays.

Following capture, prisoners would be held inside the droid, until the Imperial officer in charge was notified of the capture and had determined the appropriate course of action. They were often used with Imperial Customs Frigates and Guardian-class patrol ships.

However, like capital-ships, it possessed a design flaw: Someone imprisoned could gain access and hijack a Hunter-Killer probot via its control room and thus it creates the risk of it turning against the Empire.

History

After the Viper probe droids proved successful at locating Rebel bases, Arakyd gambled by producing a massive 150 meter droid. The H-K found great favor in the Empire, used to capture smugglers and Rebel ships.

A number of Hunter-Killers were stationed around Byss after Palpatine's return. A notable flaw in the design was exploited when a smuggler being held inside an H-K broke into the control room, and took control of the droid.
