- Spotlight

Size: 0.4m

Move: 7

Description: BD units were a model of explorer droid.

### *Characteristics*

BD units were companion droids designed to assist with operations in remote and dangerous locations across the galaxy; programmed to be the ideal assistant to researchers or explorers operating alone in the field, they were designed to traverse all types of terrain. As a result of their manufacturer collapsing,

BD units were a relatively rare sight in the galaxy.

#### *Notable units*

One such droid was BD-1, who accompanied Jedi Master Eno Cordova, and later the Jedi Padawan Cal Kestis in 14 BBY. Another BD unit was TA-418, who assisted Doctor Eustacia Okka, former professor at the Shadow University institution during the Imperial Era.
