

Name: MerenData V-series droid supervisor Height: 1.9 meters Manufacturer: MerenData Class: Supervisor droid Degree: Third-degree droid Plating color: Black, gray, white

Dexterity: 1D

Knowledge: 2D Bureaucracy 4D, Languages 3D Mechanical: 1D Perception: 2D Bargain 3D, Command 4D, Investigation 3D, Persuasion 4D Strength: 1D

Equipped with:

Technical: 1D

Humanoid Body (two arms, two legs, head) Vocabulator speech/ sound system Broadband broadcast antenna/receiver system Internal high-frequency binary comlink Photoreceptors (Human range) Recharge coupling access port

Move: 8 Size: 1.8 meters tall Cost: 1,500 (used)

Description: The V-series droid supervisor was a model of supervisor droid manfuactured by MerenData. A relaunch of the EV-series supervisor droid marketed towards the Imperial Military, its perfomance was unimpressive and the model was a financial failure.

Characteristics

A model of supervisor droid, the V-series had similar attributes to its precursor, the EV-series supervisor droid, but also featured a more tolerable personality. It lacked the MDF motivator that was installed in many first-generation EVs, which had increased efficiency at the cost of higher rates of attrition among the droids they oversaw. Despite being equipped with an augmented monitor system, the V-series' performance was unimpressive by comparison.

History

Manufactured by MerenData, the V-series droid supervisor was a relaunch of the EV-series marketed towards the Imperial Military. However, its perfomance was considered unimpressive and the model failed spectacularly, becoming a financial failure for MerenData.
