* Astromech droids, if acting in co-pilot capacity, may attempt starship repairs while in flight.

Equipped With:
- Three wheeled legs (one retractable)
- Retractable heavy grasper arm (lifting skill at 2D)
- Retractable fine work grasper arm
- Extendable 0.3 metre long video sensor (360o rotation)
- Small electric arc welder (1D to 5D damage, 0.3 metre range)
- Small circular saw (4D damage, 0.3 metre range)
- Video display screen
- Holographic projector/recorder
- Fire extinguisher
- Acoustic signaller
- Small (20cm. by 8 cm.) internal "cargo" area
- Some additional tools and equipment

Move: 5

Description: R2-C4 was an R2 series astromech droid manufactured by Industrial Automaton that belonged to the Space Fighter Corps of the Royal House of the planet Naboo, often serving in the astromech socket of the N-1 starfighter Bravo 6. During the occupation of Naboo by the Trade Federation in 32 BBY, R2-C4 was one of several Fighter Corps droids that was held in the hangar of the Theed Royal Palace in the capital city of Theed.

When Queen Padmé Amidala of Naboo led the Royal Naboo Security Forces in an attempt to re-

take the palace, the group attacked the Trade Federation's battle droids stationed in the hangar, while the pilots of the Fighter Corps made their way to the s parked in the hangar so that they could take off and attack the Trade Federation's blockade of the planet. Once the security forces entered the hangar, R2-C4 and the other Fighter Corps droids began moving towards the starfighters along with the pilots. Those that managed to reach their vehicles launched from the hangar and engaged the Trade Federation's blockade of the planet in orbit, ultimately helping to defeat the Federation and free Naboo.
