

Starships D6 / Sienar Fleet Systems Exo

Excalibur Frigate

The Excalibur-class fast frigate is a built to perform the missions of anti starfighter escort and fleet flank protection. These missions was earlier performed by Nebulon-B:s and other escort frigates but they were too slow to operate with Imperial SD:s and Aegis SC:s so this new ship was constructed. Using a shrunked version of the Immobilizer hull the engineers where able to construct this class in only 2 months.
