Starships D6 / Feethan Ottraw Scalable Asse

Name: Feethan Ottraw Scalable Assemblies Mankvim-814 light interceptor
Manufacturer: Feethan Ottraw Scalable Assemblies
Model: Mankvim-814 light interceptor
Class: Starfighter
Scale: Starfighter
Length: 10.7 meters
Width: 6.46 meters
Height/depth: 3.45 meters
Skill: Starfighter Piloting - Mankvim-814
Crew: 1
Crew Skill: varies
Consumables: 2 hours
Cost: New: 15,000 credits, Used: 6,000 credits
Cargo Capacity: 5 Kilograms
Hyperdrive Multiplier: x1
Hyperdrive Backup: NA
Nav Computer: No
Space: 9
Atmosphere: 475;1,450 km/h
Maneuverability: 3D
Hull: 3D
Shields: 1D
Sensors:
- Passive: 15/1D
- Scan: 30/1D+2
- Search: 45/2D+1
- Focus: 2/3D

Weapons:
- Light laser cannons (2)
  - Fire Arc: Front
  - Fire Control: 2D
  - Space: 1-5/12/25
  - Atmosphere Range: 100-500/1.2/2.5km
  - Damage: 4D

Description: The Mankvim-814 light interceptor, also known as the Techno Union starfighter, or Rattletrap, was a starfighter used by the Confederacy of Independent Systems near the close of the Clone Wars.

Characteristics
The Mankvim-814's simple construction consisted largely of a reactor feeding power to a high-velocity ion drive. A magnetized rudder tilted the ion flow for off-axis thrust, while side thrusters aided roll and yaw adjustments.

The interceptor was armed with twin rapid-fire laser cannons and durable deflector shields for combat. The Mankvim-814 light interceptor seated one pilot, typically a droid pilot. The interceptor's aerodynamic wings, fitted with repulsorlifts, aided the overall maneuverability.

History
The Mankvim-814 was a bulbous, oval-shaped, short-range fighter created by the Feethan Ottraw Scalable Assemblies on behalf of the Techno Union on the planet Utapau. The Techno Union built these tiny, short-ranged starfighters on the planet from local materials. They were hastily constructed in the Grand Halls without any regard for Utapau's architectural heritage.

The model was later given to the Corporate Sector Authority, where it was used and produced in limited numbers.

During the Battle of Murkhana on the final day of the Clone Wars, they were used to combat incoming Republic forces.

During the Galactic Civil War, a number of spacers including Kiro Celsius, used this type of craft for atmospheric travel. The wreck of a crashed Mankvim-814 was found outside of Nym's Stronghold on Lok.
