Move: 64; 180 kmh
Body Strength: 3D+2
Weapons:

Description: Tatooine repulsor trains were used by the Pyke Syndicate to transport spice on the Tatooine. One train was destroyed by Boba Fett and the Tusken Raider tribe that he had joined after the Pykes onboard had attacked the tribe on multiple occasions. Later, Jawas who brought Din Djarin a cryogenic density combustion booster said they found it underneath a Pyke train.
