Characters D6 / LIN-V8K (LIN Demolitionmecl

Name: LIN-V8K
Homeworld: Tatooine
Manufacturer: Cybot Galactica
Model: LIN demolitionmech autonomous minelayer
Class: Droid

DEXTERITY 1D
KNOWLEDGE 1D
MECHANICAL 1D
PERCEPTION 3D
    Search 3D+2
STRENGTH 4D+2
TECHNICAL 3D
    Demolitions 6D
    Mining 4D

Equipped With:
    -Internal comlink
    -Infrared sensors (360 degrees night vision)
    -Internal storage space (20 Kg)
    -Video sensor
    -Dual-tread locomotion
    -Fine manipulator arm under dome (for planting explosives)
    -Cybot acoustic signaler (can only speak droid languages)
    -Armored housing (+2D to Strength)

Move: 5
Height: 0.56 meters
Cost: 7,000

Note:The LIN droid was equipped with a visual sensor and an acoustic signaler that could communicate in the warbling of Droidspeak only. It could be used as a military droid, helping to deploy pressure bombs and anti-repulsor grenades.
The droid was able to move its manipulator arm 360 degrees, so it could both lay mines where it had just been and keep them away from its own heading.

Description: LIN-V8K was an LIN Demolitionmech droid used for mining operations. He planted explosives on rocks to clear a path in mines. He could see through radiation, fog and even sand and light ground fill. He was found by Jawas on Tatooine at an abandoned military garrison. The Jawa sandcrawler, in which he was to be sold from was later raided by the Galactic Empire. LIN-V8K was rescued by the Squib trader Macemillian-winduarté before the Imperials destroyed the sandcrawler.
