Description: The Aki-Aki were a sentient species native to the desert planet Pasaana. They were generally peaceful and hospitable, and welcomed offworlders to their planet. The Aki-Aki maintained a pre-starflight level of civilization, but did adopt a number of advanced tools to aid in their life on Pasaana. Aki-Aki history was not always peaceful, however; their species faced strife between scattered clans, though they eventually worked together to survive Pasaana's harsh climate.
