Description: The Tri-Wing S-91x Pegasus Starfighter, or simply the Tri-wing, was a type of starship that was manufactured by Incom Corporation and later classified as a New Republic Light Assault Starship. It was active during the Imperial Era, with one spotted by Princess Leia Organa on Alderaan in 9 BBY. The Tri-wing continued service during the New Republic Era.

### *Characteristics*

The Tri-Wing S-91x Pegasus Starfighter, simply referred to as a Tri-wing, was a class of starship that was manufactured by Incom Corporation. It was equipped with two engines, an R2 series astromech droid pocket, at least two frontal laser cannons, and a cockpit for a pilot and two passengers. The hull was metallic silver. The starfighter was later considered to be New Republic Light Assault Starship.

### *History*

The Tri-Wing S-91 Pegasus Starfighter was active during the Imperial Era, introduced by 9 BBY. One tri-wing was present on the capital city of the Core Worlds planet Alderaan, Aldera. Princess Leia Organa witnessed the tri-wing depart the city from a forested area while she was starship spotting. Leia spoke with her droid, L0-LA59, hypothesizing that an Aquillian Ranger was piloting it to scout for the Merson pirates. After Lola was skeptical, Leia then believed it could be a trader. The Tri-wing went on to serve during the New Republic Era, and was used by the New Republic and Resistance.
