Moons: Several
Grid square: L-8
Primary terrain: Colorful grasslands
Points of interest: Ahsoka Tano's village
Flora: Pine
Fauna: Kybuck
Native species: Togruta
Primary language(s): Togruti
Government: Monarchy

Description: Shili was a planet located in the Shili system within the Expansion Region, that was the homeworld of the sentient Togruta species. Because Shili had colorful grasslands, the natives displayed distinctive skin patterns for camouflaging. Jedi Master Shaak Ti and former Padawan Ahsoka Tano of the Jedi Order were Togruta who hailed from this world.

Culture
Shili was known to produce famously melodramatic holovids. One of the signs in Shili's zodiac system was called Ai. Its traits were wisdom, charisma, and exceptional virility. The constellation representing that sign was formed from blue dwarf stars. A being born under Ai also had the sign Genry on Coruscant.

Description
In Tales of the Jedi, Shili is depicted as grasslands and pine forests.

Places of Interest
Ahsoka Tano's village
A village located on Shili was inhabited by members of the Togruta species, including a young Ahsoka Tano and her mother, Pav-ti. The village was surrounded by a forest of pine trees that was home to kybucks.
