

Name: JPP-192 Limospeeder

Type: Air Speeder

Scale: Speeder

Length: 7 meters

Width: 2.8 meters

Height: 2.2 meters

Skill: Repulsorlift operation: Air Speeder

Crew: 1

Passengers: 4

Cargo Capacity: 250kg

Cover: Full

Altitude Range: Ground level-1500m

Maneuverability: 1D

Move: 60; 500kmh

Body Strength: 5D

Weapons:

Hull: Quadrilayer-luster pearlescent finish

Communication systems: Internal comlink

Description: A Senate limousine was a type of limousine used by Mon Mothma as transportation on Coruscant.

A limousine, often shortened to limo and alternatively called a repulsorlimo, limo-speeder, or hoverlimo, was a longer-than-usual landspeeder, usually used by beings of importance. A similar vehicle, the groundlimo, was a ground-effect vehicle and not a repulsorcraft. Under Supreme Slavelord Trioculus, officers of the Galactic Empire commonly rode in landspeeder limousines when traveling on Kessel.
