Characters D6 / KMD-RA-71 (Imperial Protocc

Name: KMD-RA-71
Manufacturer: Arakyd Industries
Model: RA-7 protocol droid
Class: Protocol droid
Height: 1.7 meters
Gender: Masculine programming
Sensor color: Black
Plating color: Silver

Dexterity: 1D
Knowledge: 2D
Bureaucracy 4D, Business 3D Languages 5D
Mechanical: 1D
Perception: 2D
Bargain 3D, Search 5D, Lipreading 5D
Strength: 1D
Technical: 1D
Communications 5D, Security 3D

Equipped with:
Humanoid Body (two arms, two legs, head)
Broadband photoreceptors with anti-glare coating - Improved sensor package allowing low-light vision
Interface connection port
Decorative chest plate
Concealed comlink
Concealed Holorecorder
Two Audio Sensors - wide frequency monitoring systems
Vocabulator
Translator unit with 3 million forms of communication

Move: 8
Force Sensitive: N
Force Points: 1
Dark Side Points: 0
Character Points: 1

Description: KMD-RA-71 was a silver-plated RA-7 protocol droid with masculine programming that served the Galactic Empire. It was present in Jedha City on the moon of Jedha in the year 0 BBY. When the Galactic Empire evacuated its forces from Jedha, KMD-RA-71 was "accidentally" left behind by his owner, and looked up to see the Star Destroyer Dauntless departing. The Empire then destroyed Jedha City with the Death Star superweapon.

Biography

KMD-RA-71 was an RA-7 protocol droid with masculine programming who served the Galactic Empire and spent time on the moon of Jedha in the year 0 BBY. The droid was walking through a street filled with market stalls in Jedha City when a pair of children dashed past it, causing KMD-RA-71 to pause in front of three members of the Central Isopter cult and turn to look at the area where the children had been.

When the Galactic Empire evacuated its forces from Jedha, KMD-RA-71 was "accidentally" left behind by his owner and looked up at the sky as the Imperial I-class Star Destroyer Dauntless departed from above Jedha City. Shortly afterward, the Empire's Death Star superweapon fired upon Jedha City, destroying it. Leaving KMD-RA-71 behind would have brought his owner a short reprieve from having to deal with an RA-7 unit, which were considered unpleasant, before the Imperial Security Bureau assigned him a new one.

Characteristics

Like all RA-7 protocol droids, KMD-RA-71 was manufactured by Arakyd Industries and stood 1.7 meters tall. It had silver plating and black broadband photoreceptors with anti-glare coating.
