StormElite Repulsor-Grenadiers

Repulsor-grenadier refers to the Imperial StormElite's mechanized infantry. Simply, specialized tank-support troops of the SE.

These tank-support soldiers are brought into combat zones first in order to clear the area of anti-tank traps and infantry. Such vehicles as the Romulus armored personnel carrier and Cougar medium repulsortank support these troops during their ever important missions.

Repulsor-grenadiers operate separate of regular soldiers and shock troops, but their role in the StormElite probably differs the most. Repulsor-grenadiers assist every branch of the SE, due in part to the fact that every branch of the StormElite operates with armor.

The standard uniform for a repulsor-grenadier include an early war camouflage pullover, gray field tunic and trousers, field helmet, and light backpack with combat suspenders.
