Move: 10
Orneriness: 2D

Description: A species of large, non-sentient, purple beast could be found on the planet Korba. The creatures' skin and hair were purple, and their round, large eyes and mouth were black. They possessed two ears and four legs that ended in three orange feet with black claws. Korba's native Korbans outfitted the beasts with saddles, containers, and harnesses to ride them.

By 19 BBY, at least six beasts were present at a Korban settlement, where the Korban girl Aau groomed the purple beasts. One day, when two Korbans were riding two beasts, Aau brushed a beast and pried a shelled insect off the creature's side after it neighed.
