Description: Mycho Zala was a prospector during the High Republic Era. He was an associate of Jedi Master Zia Zaldor Zana and friend of the Jedi Order, and met Jedi Initiate Kai Brightstar and Tenoo pilot Nash Durango on Tatooine in 232 BBY to receive a hyperdrive capacitor. He was able to speak Galactic Basic and Jawaese, using his skill in the latter language to settle a miscommunication between the two youths and local Jawas.
