Description: The Tharnkan Story Stone, also called the Story Stone, was a force artifact created by the inhabitants of the planet Tharnaka. The Tharnakans accidentally left the artifact behind when they fled Tharnaka during a massive storm, which caused flooding all over the planet. In 232 BBY, the explorer droid 0G-LC, along with the help of Jedi younglings Kai Brightstar, Nubs, and Lys Solay, visited Tharnaka to retrieve the artifact in order to study it further. However, upon their discovery of the Story Stone, a small crew entered the cave from an opening above, taking the artifact.
