Droids D6 / Cybot Galactica SP-4 ISC

Type: Cybot Galactica SP-4 ISC
Manufacturer: Cybot Galactica
Model: Modified SP-4 analysis droid
Class: Analysis droid
Sensor color: Black

Dexterity: 2D
Dodge 3D
Knowledge: 2D
Alien Species 3D, Cultures 3D, Planetary Systems 4D, Value 3D
Mechanical: 1D
Perception: 3D
Investigation 5D
Strength: 2D
Technical: 3D
Computer Programming/Repair 5D, Droid Programming/Repair 5D, Security 6D

Equipped with:
Humanoid Body (two arms, head)
Repulsorlift system
Two visual and two auditory sensors - human range
Visual Magnfication (microscopic)
Vocabulator speach / sound system
AX-20 Droid Brain

Move: 10

Description: The SP-4 ISC, also known simply as the ISC droid, crime scene analysis droid, or crime scene analyzer droid, was a modified SP-4 analysis droid utilized by the Jedi Order to assist Jedi investigators while they were working on a variety of cases. Towards the end of the Galactic Republic as the dark side of the Force grew stronger, the influence of the Jedi waned, forcing them to utilize increasing numbers of analysis droids to assist in solving crimes. Notable analysis droids included Russo-ISC, who was a crime scene analysis droid assigned to the Jedi Temple to assist Jedi Anakin Skywalker and Ahsoka Tano to investigate the bombing of the Jedi Temple hangar. The SP-4 ISC unit was used by the Imperial Security Bureau following the rise of the Galactic Empire, coming to be known as the Imperial forensics droid.
