Scale: Speeder
Passengers: 12 (or cargo)
Cargo Capacity: 5 tonnes
Cost: 5,800 (new), 2,400 (used)
Cover: Full
Altitude Range: Ground level-10m
Maneuverability: -1D
Move: as Towing Vehicle
Body Strength: 3D
Weapons:

Description: The Pod-Wagon is a towed trailer which can be used to add cargo capacity to any repulsorlift vehicle, and can be attached to vehicles as small as Speeder Bikes. It provides no forward momentum itself, only hovering, but can travel at whatever speed the vehicle it is attached can reach. However the large size of the Pod-Wagon reduces the manueverability of the towing vehicle.
It is possible, if unwieldy to connect a line of Pod-Wagons to one vehicle to carry a large quantity of cargo.
