Description: Tasi Lowa was a Zygerrian Jedi of the Jedi Order who lived during the High Republic Era. She was the Padawan of Jedi Knight Yord Fandar. Lowa and Fandar visited the Trade Federation freighter Fallon to find the meknek Verosha "Osha" Aniseya, who was incriminated for the murder of Jedi Master Indara by her twin sister, Mae-ho "Mae" Aniseya. The Zygerrian questioned Osha, who claimed she was innocent, but the two Jedi apprehended the meknek and delivered her to the Galactic Republic prison ship Palwick.

Biography

The Force-sensitive Zygerrian Tasi Lowa was a Jedi of the Jedi Order during the High Republic Era. By 132 BBY, she was the Padawan of Jedi Knight Yord Fandar and was stationed at the Jedi Temple on the capital planet Coruscant. In that year, after Jedi Master Indara was murdered by the Force-sensitive assassin Mae-ho "Mae" Aniseya on Ueda, Lowa accompanied Fandar to the Trade Federation freighter Fallon to apprehend the meknek Verosha "Osha" Aniseya—a former Jedi Padawan to Master Sol and Mae's twin sister—who had been incriminated for the crime. The two Jedi landed on the freighter in a Jedi Vector and made their way to the bridge, where Fandar introduced himself and Lowa before asking the Neimoidian captain Blex about Osha. Although the captain denied having mekneks aboard, an officer revealed Osha's location.

When Fandar met Osha in her quarters, Lowa entered, conversing with the former Jedi about her current job before questioning when she had joined the Order. Lowa noted that Osha's age had been a concern about her admittance to the Order, while Fandar brought up the loss of Osha's family shortly before her entry. Osha asked why the Jedi were there, and Lowa informed her of the murder on Ueda by a suspect matching her description. When Osha protested the idea that she had killed Indara, Lowa asked her where she had been the previous night, and the meknek claimed she had been aboard the freighter.

At Fandar's request, Lowa stepped out of the room, returning a moment later with the barkeep Cabuck, who had witnessed the murder. The barkeep identified Osha as the murderer, and the two Jedi subsequently apprehended the meknek. As the Jedi escorted her to a the prison transport Palwick, which was to take her back to Coruscant, Lowa powered down Osha's droid, Pip,

informing her of what her fate would be. Lowa handed the meknek's belongings to a droid warden, who took Osha aboard, and the transport departed. The Jedi returned to Coruscant themselves, although Osha never arrived, the prison ship having crashed after the other prisoners attempted to escape.

Personality and traits

Lowa had brown hair, purple eyes, and light skin. As a Padawan, she was studious. While questioning Osha, the Zygerrian gazed staunchly at the meknek, whose career Lowa knew to be dangerous. She stood at a height of 1.6 meters.

Powers and abilities

As a Jedi of the Jedi Order, Lowa was a Force-sensitive trained to wield the Force.

Equipment

Lowa wore a set of Jedi apparel that consisted of a white cape over a white and gold tunic. The Zygerrian also wore a brown belt over a green sash, as well as brown boots. She had several gold bands that tied back her hair. While questioning Osha Aniseya, Lowa carried a datapad.
