Special Abilities:

Infra Red Vision: Arkanians can see into the Infra Red, allowing them a bonus +1D to counter penalties for darkness, however unless they wear blinders under younger hotter suns, they suffer a -1D penalty to visual rolls.

Story Factors:

Body Alteration: It is standard practice for Arkanians to undergo genetic manipulation of their

own bodies, enhancing themselves so as to be better than "lesser" species.

Arrogance: The most defining trait of the Arkanian species was their arrogance which stemmed from their belief that they were the pinnacle of evolution. This led to them often appearing arrogant and aloof to others as they saw themselves as being superior to all other species. Even those with a more moderate viewpoint tended to see themselves as being amongst the most intelligent beings in the galaxy. As such, they were highly confident of their abilities.

Hours later, when he and Eejee Vamm were looking at Jarael's blood sample, they were both shot down by Demagol to keep them from informing Adasca of Jarael's Force-sensitivity.
