Description: Neel's hoverbike was an inexpensive hoverbike owned by the Myykian Neel on the planet At Attin during the New Republic Era.

Characteristics
The hoverbike was an inexpensive recreation speeder owned by the Myykian Neel on the planet At Attin during the New Republic Era. It was 1.04 meters long, 0.75 meters wide, 0.77 meters high and was decorated with red streamers from the handlebars.

History
Around 9 ABY, after taking the Career Assessment Test, Neel is asked by his human friend Wim to accompany him to explore what he believed might be a Jedi Temple in a ravine in the forest. After retrieving shovels from Neel's garage the boys walked their bikes through the forest.

The two later rode their bikes through the city during the Invasion of At Attin, this time joined by Wim's father Wendle on a borrowed bike.[4] Silvo's pirates pursued the trio as they raced along the halls of At Attin Middle School Gamma. One dropship shot through the building's windows and hit Neel's hoverbike, sending the boy flying. The bike was destroyed, but its rider was uninjured; he rolled away and continued to fight the pirates.[4]
