Description: Horned eopies were a species of quadrupedal mammallians found on the planet At Achrann. They were a variant of the eopies who lived on Tatooine and Saleucami.

History

The Troik Hayna told the four younglings of Skeleton Crew that their horned eopies were stolen by a Hattan patrol. SM-33 and Jod Na Nawood negotiated with the Hattan, giving the Hattan a couple of Wim's dataries, in exchange for the entire herd. Nawood and SM-33 then returned the animals to the Troiks.
