* These represent a range covering a large number of Xi'Dec species, but the Xi'Dec are incredibly diverse: attributes, special abilities and special skills can have an almost unlimited variety. When creating a Xi'Dec character, one stat may be selected to have a maximum of 5D, but also one must be lowered to a maximum of 3D

Special Skills:
Varies according to sex.
Special Abilities:
Varies according to sex. For example the female Xi'Dec, Bubbles, had engorged egg sacks on her belly which emitted a pheromone which increased her social skills by +1D.

Move: 3/15 (Varies according to sex)
Size: 0.5-10 meters (Varies according to sex)

Description: The Xi'Dec were an insectoid sentient species from Stic. Ubbla Mollbro, a female opera singer with engorged egg sacs, was a member of this species.

Xi'Dec in the galaxy
During the New Republic Era, Captain Carson Teva sent out the survival compendium "Species From A to Z," which included an entry on the Xi'Dec species. Around 9 ABY, Bubbles ,a female Xi'Dec, was a guest at the Skull Ridge Mountain Hotel & Spa on the planet Lanupa. The opera singer Ubbla Mollbro spent time in the city Canto Bight on the planet Cantonica in search for a potential partner.
