Description: The Nune-class Imperial shuttle was a transport used by the new Galactic Empire as of 137 ABY.

***Characteristics***
The Nune-class shuttle had a much larger capacity for cargo or people than previous Imperial shuttles such as the Lambda-class and Theta-class. It also kept the folding wings feature of those classes, but unlike its precursors it could land with its wings unfolded. When armed, Nune-class shuttles were equipped with turbolasers.

There was at least one variant of this model.

***History***
Emperor Roan Fel used one such shuttle to reach Bastion.

Captain Mingo Bovark used another to travel from an Ardent-class fast frigate to the Wheel during negotiations with the Galactic Alliance Core Fleet.

Sith Lord Darth Azard kept a personal shuttle which was hijacked by Monia Gahan and Sigel Dare.
