Vehicles D6 / Desler Gizh Outworld Mobility C

Name: Desler Gizh Outworld Mobility Corporation Veltiss-2 Airspeeder
Manufacturer: Desler Gizh Outworld Mobility Corporation
Model: Veltiss-2 airspeeder
Type: Airspeeder
Scale: Speeder
Cost: 19,000 credits (9,200 used)
Skill: Repulsorlift operation: Air Speeder
Crew: 1
Passengers: 1
Cargo Capacity: 30kg
Cover: Full
Altitude Range: Ground level-1000m
Maneuverability: 1D
Move: 120; 950kmh
Body Strength: 3D
Weapons:

Description: The Veltiss-2 airspeeder was a fast and lightweight airspeeder designed by Desler Gizh Outworld Mobility Corporation. It boasted significant advancement in pilot assistance technology that made navigating on urban worlds at high speed significantly easier. One such speeder was owned by Moff Nyna Calixte.

Depending on the needs of the pilot, it could be both open-topped or closed cabin. While in open-topped mode, the speeder used the microrepulsor technology to generate a "virtual hard top" - a nearly frictionless field that allowed the speeder to maintain an aerodynamic profile while protecting the passenger and the pilot associated with traveling at high speeds on worlds such as Coruscant.
