Vehicles D6 / Galactic Power Engineering GP

Name: Galactic Power Engineering GPE-3300 Airspeeder
Manufacturer: Galactic Power Engineering
Model: GPE-3000 airspeeder
Type: Airspeeder
Scale: Speeder
Cost: 60000 credits (35000 used)
Skill: Repulsorlift operation: Air Speeder
Crew: 1
Passengers: n/a
Cargo Capacity: 90kg
Consumables: 1 Day
Cover: Full
Altitude Range: Ground level-1500m
Maneuverability: 1D
Move: 120; 1000kmh
Body Strength: 4D
Weapons:

Description: The GPE-3300 was a high performance airspeeder designed by Galactic Power Engineering. It was an unorthodox design that had two large engines and an underslung cockpit. This made it hard to land on solid ground and it usually had to dock at floating platforms.

It was fast and maneuverable, and many were owned by Imperial officers as a status symbol. They were also often used by planetary police forces as pursuit craft.
