

Name: Amphistaff

Manufacturer: Yuuzhan Vong

Model: Amphistaff

Type: Exotic melee weapon

Culture: Yuuzhan Vong

Shape:

Staff form

Spear form

Whip form

Weight: 2 to 2.5 kg

Range:

Melee: reach of 1.3 meters

Thrown: 10 meters

Venom spit: 20 meters

Affiliation: Yuuzhan Vong

Scale: Character

Skill: Amphistaff

Availability: 4, X

Difficulty: Special (see below)

Damage: Special (see below)

Game Notes: The amphistaff is an organic weapon used by the Yuuzhan Vong. If used by someone familiar with its various functions, the amphistaff can be used as a quarterstaff, a two-headed spear (adds +1D to all parry rolls), a whip (adds +1D to attempts to disarm or entangle an opponent; successful hits with the whip inject venom), or a whip-spear (which shares the qualities of both the whip and the spear, though the granted bonuses are only +2 pips). In addition, the amphistaff can spit venom, or inject it with a successful whip hit that results in a damage result higher than Stunned. Either way, a victim affected by amphistaff venom must succeed at a Very Difficult Strength check. If injected, the poison reduces the victim's Dexterity score by 1D (cumulatively). If the poison is sprayed into a victim's eyes, blindness results. The effects last until the venom is treated. Statistics for amphistaff weapons are listed below:

Quarterstaff

Difficulty: Easy

Range: Melee

Damage: Str+1D+1 (max 5D)

Two-Headed Spear

Difficulty: Moderate

Range: Melee

Damage: Str+2D (max 7D)

Whip

Difficulty: Moderate

Range: Melee

Damage: Str+1D+2 (max 6D)

Venom Spitter

Difficulty: N/A

Range: 1-3/10/20

Description: Amphistaffs were genetically engineered serpentine creatures that served as the primary anti-personnel weapons of the Yuuzhan Vong.

Description

Like all Yuuzhan Vong biotechnology, amphistaffs were fully organic beings native to the Yuuzhan Vong homeworld. Young amphistaffs grew in trios from leathery polyps, reaching out and snatching whatever prey could be found and redirecting it into the polyp's gaping maw, known as the groundmouth, thus feeding all four entities simultaneously. Eventually the amphistaffs lengthened to around 2 to 3 meters, too large for their polyp to support them. They would break off, escaping their amphistaff breeding gla, and slither into the wilderness leaving the polyp to die. Amphistaffs saw in infrared light.

Fully grown amphistaffs were durable and cunning predators. Power glands in the serpent's body could emit electrical impulses that reorganized the creature's semicrystalline cell structure. This field extended a millimeter from the amphistaff's body and created razor-thin edges capable of slashing through prey. Only vunduun crabs rivaled the amphistaff in rigidity. After feeding voraciously, amphistaffs morphed into polyps to continue their species' reproduction.

If a warrior captured an amphistaff as it left its polyp, the two were bound together and the amphistaff would loyally serve its new master in battle. Hand motions from the warrior coaxed the amphistaff to either harden or become pliable, for each had its own purposes. Amphistaffs had three distinct forms: a quarterstaff, a spear, or a whip. As a hardened spear with a poisonous head, the amphistaff could be hurled, further increasing its lethality. As a flexible whip, the amphistaff could trip or pin its target and even poison it. Amphistaffs were one of the most durable objects known, as not even lightsabers could cut through them. When used as a heavy staff, the serpent would endure blow after blow from the Jedi weaponry and remain unfazed. The amphistaff's edge—measured in atoms—slashed through flesh with no resistance. In the blink of an eye, the amphistaff could soften and wind around the lightsaber's blade, its venomous jaws snapping and tearing at the unfortunate victim's face. Because of its organic nature, these creatures were capable of recovering from virtually any wounds. Nigh indestructible, an amphistaff could only be killed by repeated blunt trauma to or removal of the head.

Psychological damage was rampant in Republic soldiers that entered ranged combat with amphistaff-armed Yuuzhan Vong. When directed, an amphistaff spat venom at a distance of 20 meters. This spray was aimed directly at the target's eyes and instantly blinded them. Poison seeped through the pores and entered the victim's bloodstream, interfering with circulation and choking off the oxygen supply. Excruciating pain accompanied twenty hours of suffering until the victim finally died. Jedi Master Mara Jade Skywalker eventually created a biotoxin drill that, if administered early enough, could disrupt the venom's lethal actions.

Certain types of specialized amphistaffs, or related creatures existed among the Yuuzhan Vong. Supreme Overlords such as Shimrra Jamaane possessed uniquely gigantic variations of the typical amphistaff called Scepters of Power. Warmasters such as Tsavong Lah and Nas Choka were granted "Bats of Rank" called tsaisi. Also there was the Scepter of Entreaty which were used when one wished to supplicate the Supreme Overlord. There also existed a species of amphistaff that could be implanted within the body which could be used by infiltrators as the amphistaff would avoid detection until the appropriate time at which point they could be used. Finally, the reptoid Chazrach slaves were armed with coufees, dagger like creatures, which were inferior, less flexible, and smaller versions of the amphistaffs, to compensate for their tiny stature and lower combat skills.

History

In 33 BBY, Darth Maul fought a Yuuzhan Vong warrior with an amphistaff during his time in Cog Hive Seven.

During the Yuuzhan Vong War, the galaxy at large first learned about amphistaffs when the Praetorite Vong infiltrated ExGal-4 on Belkadan where it was wielded by the advance agent Yomin Carr. This member of the Yuuzhan Vong empire used this weapon against Jedi Mara Jade Skywalker.

A number of hibernating amphistaff's were smuggled onto Hosk Station in order to arm elements within the Givin government who were sympathetic to the Yuuzhan Vong. The aim was to create an uprising when the Yuuzhan Vong fleet arrived in the system thus securing the location.

Jacen Solo while onboard a Yuuzhan Vong seedship managed to use his Vongsense and connection to animals to gather seventeen young amphistaffs to his side and help him against the Yuuzhan Vong crew onboard the ship. He used these feral amphistaffs to also slay several of the larval Dhuryam in order to sabotage the shaping of the planet Coruscant.

At the war's close, a group of warriors crashed on Zonama Sekot, the Yuuzhan Vong's home. As the warriors exited their downed coralskippers, their amphistaffs uncoiled themselves and fled into the tampasi. All other amphistaffs were loaded onto the warships of the Yuuzhan Vong and sent crashing into Coruscant's star.

In 137 ABY, Jariah Syn traveled to Wayland, where he managed to tame one of the native amphistaffs and used it as a weapon, which he named Heartstriker.
