Starships D6 / Galactic Power Engineering G

Name: Galactic Power Engineering GPE-7300 Space Transport
Type: Transport Shuttle
Scale: Starfighter
Cost: 165,000 credits (90,000 used)
Skill: Space Transports Piloting: GPE-7300 Space Transport
Crew: 1
Crew Skill: Space Transports 5D, Starship Gunnery 5D, Starship Shields 4D, Astrogation 4D
Passengers: 4
Cargo Capacity: 45 metric tons
Consumables: 1 month
Cost: Not for sale to civilians
Hyperdrive Multiplier: x2
Hyperdrive Backup: na
Nav Computer: Yes
Maneuverability: 1D
Space: 5
Atmosphere: 350; 1050 kmh
Hull: 4D
Shields: 2D+2
Sensors:
- Passive: 20/0D
- Scan: 40/1D
- Search: 80/2D
- Focus: 3/2D+2

Weapons:
- Heavy laser cannons
  - Fire Arc: Front
  - Skill: Starship Gunnery
  - Fire Control: 2D
  - Space Range: 1-3/12/25
  - Atmosphere Range: 100-300/1.2/2.5 km
  - Damage: 5D

Description: The GPE-7300 was sturdy and fast space transport built by Galactic Power Engineering.

Characteristics
The freighter had two oversized engines that were mounted on the bottom of the ship. This provided excellent atmospheric thrust and high speeds in space. The body was boxy and not very aesthetically pleasing, but efficient. The ship did not have high cargo capacity, and was more of a long-range shuttle than a true freighter.

It landed perpendicular to the ground which allowed it to use its primary thrusters for lift and reduced the strain on the repulsorlift engines. The cockpit was at a 90 degree angle compared to the rest of the ship.

History

The GPE-7300 followed the Galactic Power Engineering's designs for airspeeders and podracers and was designed by the same engineers that created the GPE-3300 airspeeder. It was often used by smugglers and bounty hunters who didn't need large cargo carrying capability. Azlyn Rae used one such ship to track down Cade Skywalker on Iego.
