Amphibious: Lyrobru can breathe in water as well as they can breathe in air.

Bite: Although a peaceful race, their ancestry has left them with a set of fangs in their dog-like mouth which allows them to bite for Str+1D damage.

Story Factors:

Work hard and play hard: Lyrobru are an industrious species, but they also like to take advantage of their hard work by taking holidays and enjoying themselves.

Move: 10/12

Description: Lyrobru was a sentient species that existed in the galaxy.

Biology and appearance

Lyrobru was a humanoid sentient species that was distinguished by their blue and tan or brown skin and dog-like faces.

Species in the galaxy

In the year 132 BBY, during the High Republic Era, a member of this species had been detained by the Galactic Republic, breaking free alongside Verosha Aniseya, but being re-apprehended by the Jedi Order shortly thereafter. Much later, during the reign of the Galactic Empire, in 5 BBY, a member of this species could be found on the planet Niamos, specifically lounging on the beaches around Pier Nine when Cassian Jeron Andor was arrested. By 3 BBY, a member of this species was present on the planet Ghorman.
