Description: Darth Talon was a female Lethan Twi'lek who became a Sith Lady in Darth Krayt's One Sith in 137 ABY. Talon was styled with black Sith tattoos covering her body including her head and lekku; each tattoo had been earned in ritual combat and inscribed by Krayt himself. As a Sith apprentice, she was trained by a fellow Twi'lek Sith Lord named Darth Ruyn, whom she later killed on Krayt's command with a swift decapitating strike of her lightsaber, shortly before ascending to the rank of a full-fledged Sith in Krayt's Order.

Recognizing her unshakeable loyalty, Krayt anointed Talon as one of his two Hands, thus making her an extension of the Dark Lord's own will. In this capacity, Talon found herself working alongside her Hand counterpart, Darth Nihl. Talon was often tasked with her Master's most important missions, including the capture of the Jedi fugitive Cade Skywalker. She attempted to get him to join the One sith. She tried to seduce him to the dark side along with sleeping with him to form a bond and stronger connection to the dark side. She aided his training in the ways of the dark side of the Force, until her apprentice renounced the One Sith when he stabbed her with his father’s lightsaber. Talon always remained loyal to her lord, Darth Krayt, even during Darth Wyyrlok's attempted takeover of the One Sith, aiding Krayt in his recovery and along with Nihl fighting off the Sith who stood between Krayt and his former Voice, witnessing his return to power. When Darth Krayt finally fell during the Battle of Coruscant, she entered hiding along with the rest of the One Sith, working from concealment to achieve their goals by less overt means.

Powers and abilities
Talon's ability in combat was considerable. She literally and metaphorically "disarmed" Elke Vetter without taking any physical damage. Her skill at fighting was further exemplified by the fact that she was anointed as one of Darth Krayt's two Hands, as aforementioned. On Vendaxa, Darth Talon was able to outfight the two Jedi Shado Vao and Wolf Sazen simultaneously, showing her aptitude at lightsaber combat. Only a last-second move from the nearby Princess Fel prevented Talon from slaying Master Sazen.

She was known to use acrobatic flips and leaps in lightsaber combat, possibly making her a user of Ataru lightsaber combat. As she had often, if not always, fought one-handed, she may have had some application of Makashi. Her talents at fighting, as well as her rank of Hand, put her at a status greater than the majority of the Sith.

Talon was also skilled in Force techniques such as Force lightning, by which she executed Imperial Knight Elke Vetter. She was able to verbally reveal vital information from Vetter by a Force technique where she summoned a cyan circle of light before her adversary. She even manipulated the minds of beasts to aid her in her battle against the Jedi. And she was once able to Force push Shado Vao to the ground with such strength that he was unable to recover for some time. Talon had a Force-bond with Cade Skywalker, a result of being healed by him. Thus, she could sense his feelings with ease. She could also sense Darth Krayt's life force and release him from stasis, which she accomplished with the aid of Force lightning.

Darth Talon was able to shadow a Princess as she was running away from the burning Imperial Mission that was her former hiding spot, indicating her skill at concealment. Whether it was physical, Force-affiliated, or a mixture of both was unknown. If Force-affiliated, this might be indicative of the rare talent of Force concealment. Talon also acted as an able pilot, knowing how to operate starships and a speeder bike.
